

1

The world faces a grave nutrition situation...

2 billion people lack key micronutrients like iron and vitamin A

155 million children are stunted

52 million children are wasted

2 billion adults are overweight or obese

41 million children are overweight

88% of countries face a serious burden of either two or three forms of malnutrition

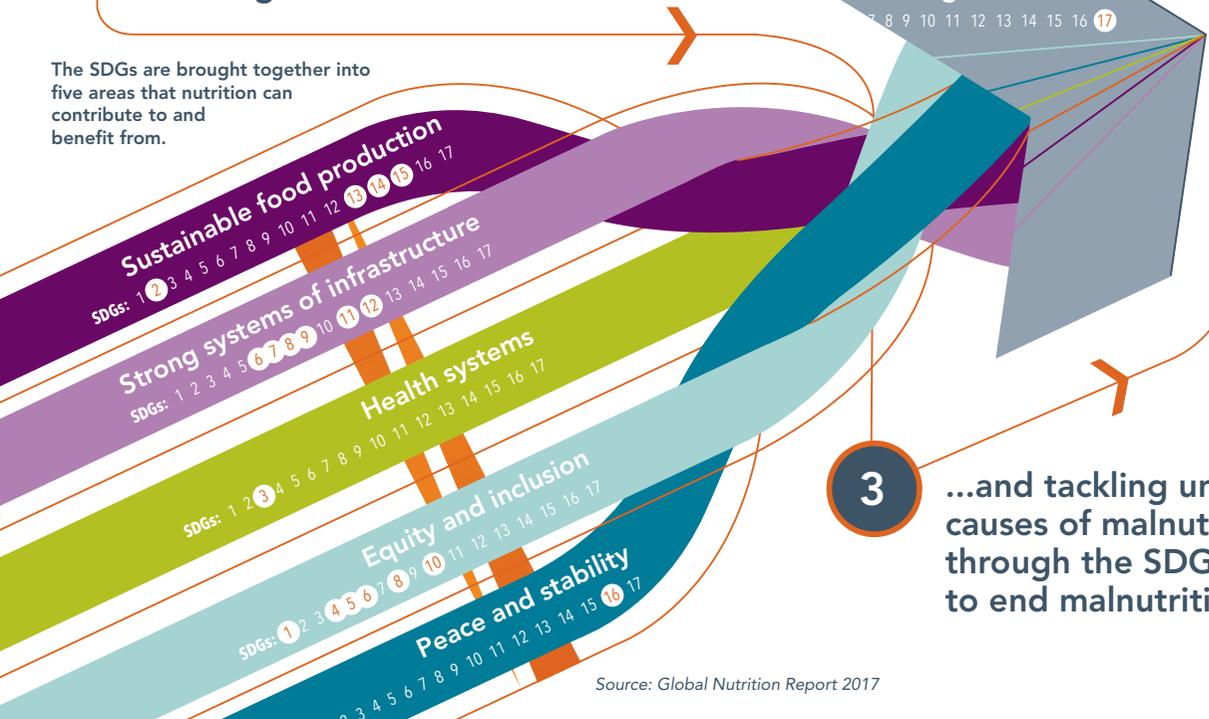

And the world is off track to meet all global nutrition targets

...but the SDGs present an unprecedented opportunity for universal and integrated change.

2

Improving nutrition will be a catalyst for achieving goals throughout the SDGs...

The SDGs are brought together into five areas that nutrition can contribute to and benefit from.

Source: Global Nutrition Report 2017

4

There is significant opportunity for financing a more integrated approach to improving nutrition universally

Malnutrition has a high economic and health cost and a return of \$16 for every \$1 invested.

1 in 3 people are malnourished...

0.5%

...but global spending by donors on undernutrition is 0.5% of ODA...

0.01%

...and on NCDs and obesity is 0.01% of global ODA.

The bigger opportunity is for governments and others to invest in nutrition in an integrated way, across sectors that impact nutrition outcomes indirectly, like education, climate change, or water and sanitation.

5

To leave no one behind, we must fill gaps and change the way we analyse and use data

Data gaps are hindering accountability and progress. To improve nutrition universally we need better, more regular, disaggregated data.

6

We must make sure commitments are concrete pledges that are acted on

Deep, embedded political commitment to nutrition will be key to progress. Commitments need to be ambitious and relevant to the problem, leaving no-one behind.

7

There is an exciting opportunity to achieve global nutrition targets while catalysing other development goals

Double duty actions

Tackle more than one form of malnutrition

Will increase the effectiveness and efficiency of investment of time, energy and resources to improve nutrition

Triple duty actions

Tackle malnutrition and other development challenges

Could yield multiple benefits across the SDGs

3

...and tackling underlying causes of malnutrition through the SDGs will help to end malnutrition.

Ending malnutrition in all its forms will catalyse improved outcomes across the SDGs
